

NEW CS 80

Powerful, effective & *even more* value for money

GreenMech
The Professionals' Choice

GreenMech's range of Pedestrian Chippers is now expanded with the introduction of the CS 80.

Featuring a 12hp pull-start engine, the CS 80 becomes the new, entry-level model but maintains the CS 100's well-established reputation for combining useable power with accessibility.

The CS 80 is ideal for gardens, estates, leisure and amenity applications where access can often be limited.

Key features

- ⦿ 100mm chipping capacity
- ⦿ 12 hp Loncin pull-start engine
- ⦿ Twin reversible chipping blades
- ⦿ Adjustable discharge chute
- ⦿ Optional dedicated trailer
- ⦿ From 191kg weight

3 YEAR
WARRANTY
AS STANDARD

The Professionals' Choice

Powerful, effective & even more value for money

The compact gravity feed chipper that copes with all tasks

Designed with the professional Landscaper, Arborist or Parks Manager in mind, the CS 80 makes easy work of a wide range of wood waste and vegetation. Compact and easy to move, this powerful workhorse combines versatility with economy making it the ideal chipper for big jobs in small spaces.

Its impressive chipping ability for timber up to 100mm in diameter is provided by twin long-life reversible blades made of high grade steel that can be easily re-sharpened, thus helping to ensure low running costs.

The wide, open design of the infeed chute enables large volumes of bushy material to be processed with minimal snedding/reducing, saving you time and money. A powerful centrifugal force with the help of a deflector plate ejects the wood chip out of the discharge chute. Three positions on the discharge head along with the adjustable deflector allow the operator to chip into the required direction and up to 5m.

The CS 80 has the option of being transported in the back of a van or on its own bespoke trailer. At only 760mm wide it easily gets into tight spaces and through restricted access such as back gardens, making it perfect for 'on-the-spot' chipping.

Fabricated from sheet steel at our Warwickshire manufacturing headquarters, this robust chipper is unquestionably built to last. Our exacting engineering standards coupled with top quality paint finish ensure it will stand up to the rigours of daily use and keep its looks and value for years to come.
