Wherever you're working, whatever type of branches, prunings or green waste you're processing, the Combi 200 will make your life easier. Based on the Arborist 200, it has an added robust conveyor and a massive infeed chute to make loading easy and safe. The 500 x 1200mm toothed in-feed conveyor feeds into a single horizontal roller via a generous 200 x 400mm throat opening. The sloping sides of the 1430 x 940mm infeed chute are designed to bring any small in-fed material back to the centre and onto the conveyor belt. The speed of the conveyor and roller are matched and can be easily adjusted.

Power is provided by the 45 hp Kubota diesel unit, featuring automatic tension of the drive belt to deliver optimum engine power transmission to flywheel. A remote control unit is available to manage the conveyor and roller while the operator is working away from the machine. Bottom Bar Safety Mechanism, Spare wheel, LED lights and Hitch Locks are fitted as standard equipment.
